1971 Lola T212 #HU22

Chassis numbers: 22 and 23 went as Team cars to BG Racing Team Germany. This Team was owned by Karl von Wendt, a race driver himself. He started with Porsche and later the Lola's. The two cars were run and prepared by Team Bonnier. This is the reason a lot of people think they are Filipinetti cars. They were painted white with different stripes on both fenders one blue & one red; chassis number 22 was delivered with white body to Bonnier. The drivers were H. Marko, J-P Jabouille and Gijs Van Lennep, entered in the 2L Championship in 1971. Sometimes both cars, sometime only one and Marko was '71 Driver Champion. At the Vallelunga Race 31.10.71 the last 2L Europa Championship race Marko raced an old 210 because the 212`s were already on the way to Africa for the Springboock Series. This car has HTP papers.
