1961 Ferrari 156

After dominating the 1961 F1 Season and capturing the World Championship for Phil Hill, the 156 Formula 1 cars were ultimately scrapped by the Factory. This car has been lovingly re-created, using where possible original parts. These include engine, transmission, carburettors etc. Well known in historic racing and driven at Zandvoort last year by Jan Lammers. Excellent spares package Offered at a fraction of the build cost.
