2014 Alfa Romeo 4C

Just arrived. Only 663 miles. The Alfa Romeo 4C (Type 960) is a mid-engined, lightweight, rear-wheel drive sports car. Available in coupé and spider body style, it uses a carbon fibre body, front and rear crash box, and hybrid rear subframe mainly out of aluminium to keep weight at 895 kilograms (1,973 lb) and 1,050 kilograms (2,315 lb) in the United States. The 4C is Alfa Romeo's first mass-produced vehicle of the 21st century to re-enter the North American automotive market. Awards:- The Alfa Romeo 4C Concept was voted the 'Most Beautiful Concept Car of the Year' award by the readers of German magazine Auto Bild, and won the Auto Bild Design Award 2011. It was awarded the "Design Award for Concept Cars & Prototypes" by referendum of the public in Villa d'Este.
