# 2007 Mercedes CLK AMG DTM Convertible

This is a rare & exclusive opportunity to own one of the most collectable of all Mercedes Benz ever made. One for the serious collector. Completely unlike anything else that Mercedes-Benz produce, this is a very unique car, and 1 of just 6 built for the Right Hand Drive market. The CLK DTM AMG was a very limited edition car made for racing homologation using bespoke parts. The convertible version is even rarer, 100 units were planned but just 80 were built, of which 6 were Right Hand Drive. The wide arches, wide rear track and big wing all look like they were taken from a serious race car. Most of the bodywork is made from carbon reinforced plastic, so it doesn't actually share much with a standard CLK. The engine is a 5.4L supercharged V8 (as found in the McLaren SLR). Figures are quoted at 582 BHP, but many experts say it produced the same 620 BHP as the SLR? It gains speed like nothing else and will keep on going to over 200 MPH, the fastest '4 Seater convertible' ever built! The interior is covered with Carbon Fibre, Black Leather and Charcoal Alcantara. It has the usual creature comforts such as Satellite Navigation, COMAND and Climate Control Air Conditioning, but as you hold onto the Alcantara covered Steering Wheel and sit in the Carbon Fibre Racing Seat, you never forget you are in a very serious car. The specification list includes: 19" & 20" AMG Split Rim Alloy Wheels Carbon Fibre Rear Boot Spoiler, Carbon Fibre Wide Arches 4 Carbon Fibre Racing Seats trimmed in Black Leather & Charcoal Alcantara COMAND Climate Control The car has a full Mercedes Benz Service History: 03/10/2008 - 4,771 miles - Mercedes-Benz Southampton 30/10/2009 - 11,343 miles - Mercedes-Benz Brooklands 08/02/2011 - 15,693 miles - Mercedes-Benz Brooklands 08/05/2012 - 17,568 miles - Mercedes-Benz 20/09/2013 - 24,295 miles - Mercedes-Benz Brooklands 15/06/2017 – 27,484 miles – Mercedes -Benz Lister Boston
