1965 Jaguar E-Type

Surely one of the most attractive racing E-Types around, built by R.S. Panels in 1994 as a faithful copy of CUT 7 which they were rebuilding at that time. Successfully campaigned everywhere by the current owner for the past 15 years including the Goodwood Revival and multiple Spa six Hours. Meticulously maintained to a very high standard with a no expense spared approach, complete with a very comprehensive spares package and recently renewed HTP's valid until 2035. This Low Drag is both fast and beautiful. Pre '66 E-type
