

1973 Lola T330/332

This F5000 started life in 1973 as a T330 and following an accident at Surfers Paradise in 1974 was upgraded to T332 specification for the 1975 Tasman series. Imported and rebuilt by ourselves in 2001, the car has been well known ever since and a past overall winner of the HSCC Derek Bell Championship. The car is currently ready to go with all safety equipment in date and benefits from a recent engine rebuild with test miles only. It comes complete with a large amount of spares and represents a great way to experience slicks and wings, with plenty of power!
